

Calendrier Lunaire selon Maria Thun

Ouvrez la fenêtre de recherche par ctr-F,
insérez votre date au format jj/mm/aa et envoyez.

La semaine autour de votre date s'ouvre :

 = journée fruits

 = journée fleurs

 = journée feuilles

 = journée racines

L'heure indique le début de la phase.

Les flèches signalent les phases montantes et descendantes :

Travaillez les parties aériennes en phase montante
et les parties terriennes et sémis en phase descendante.

Une date est en rouge lors des noeuds lunaires et périgée ou
apogée - moments à éviter pour le jardinage.

Si vous êtes sur internet, vous pouvez cliquer sur la constellation
pour la voir en image. La lune vous aidera à trouver ses étoiles.

Ceci est le plus facile en hiver et hors de la pleine lune.

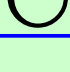

Petit à petit, vous n'aurez plus besoin d'un quelconque
calendrier pour savoir quand il faut planter le chou ...

Bon Jardinage !

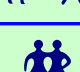

Gisbert Bölling
